Manufacturer's Representative

Saras & Associates

Products and Services Represented

Cold Formed Parts

Cold-Formed parts and specialty fasteners
Special shapes, sizes and materials.

Four-Slide Components

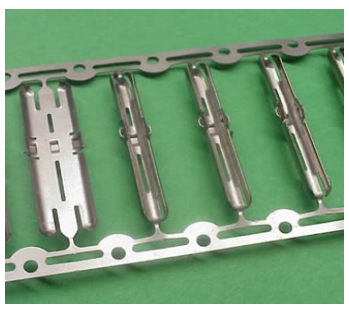
Precision Four-slide components and Progressive Metal Stampings manufactured to your drawings and specifications. From design through prototype samples and full production runs. We build our tooling in-house and will provide engineering assistance to help you with any of your requirements.

Fasteners

Blind rivets, nuts, bolts, screws, (square head lag screws) threaded inserts, stamped steel fasteners for the Beverage, Construction, Display, Electronics, Food Processing, OEM Manufacturing, Sheet Metal and other Metal Fabricating Industries, are available in aluminum, brass, monel, steel and stainless steel.. In addition to standard fasteners, we offer complete engineering and manufacturing of specialty items to your print or specifications.

Machining

Precision CNC, Swiss and Standard Machining of all metals and most plastics. We have considerable capabilities and expertise and will provide application engineering, prototype samples and full production of your parts. From MICRO COMPONENTS up to 6' diameter parts, we have the ability to manufacture the parts you need.



Metal Stamping

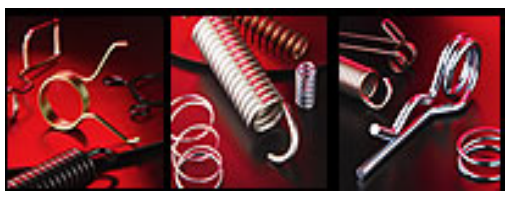
Progressive Metal Stamping and precision Four-slide components manufactured to your drawings and specifications. From design through prototype samples and full production runs. We build our tooling in-house and will provide engineering assistance to help you with any of your requirements.

Electrical Components

Connectors - Insulators - Sealing - Wing Nuts - Contact Nuts - Lugs
Spacers - Die Cast Meter Rings - Meter Jaws - Standoffs - Fuse Holders
Meter Sockets - Terminals - Corbin Handles - Panel Board Locks
Terminal Blocks - Hinges - Pad Locks - Tie Wraps - Hole Plugs
Sealing Rings - Wire Duct

Plastic Components

Precision Injection Molding, Pressure Forming and Vacuum Forming of Plastic Components. Components will be manufactured to your drawing and specifications. We will build and maintain tooling, provide engineering and prototype parts and offer extended blanket orders for long term purchases.



Springs

Precision springs manufactured to your print and specifications. We handle all aspects from concept development and engineering to tool making and full production. We will custom make any type of spring to your specifications. We specialize in complex, difficult parts and components. Springs are made from both round, square and flat stock in a variety of materials and finishes.

Wire Forms and Strip Components

Precision wire forms and strip components manufactured to your drawings and specifications. We handle all aspects from concept development and engineering to tool making and full production. We specialize in complex, difficult parts and components. Precision parts are made from both round and flat stock in a variety of materials and finishes.

We will custom design and manufacture any type of component to your specifications.

FOR A QUOTATION ON YOUR REQUIREMENTS, PLEASE CALL OR FAX SARAS & ASSOCIATES, OR MAIL US YOUR PRINT, PART OR SPECS AND QUANTITY REQUIREMENTS.
